2H410 日本原产进口 金属材料・高分子材料・有源部件・加工服务

We provide the products combining high quality with low cost by using our original continuous processing technology (welding-drawing-annealing) and dedicated equipment. Our products have been used in various fields such as medical, analytical and measuring instruments, industrial equipment, stationery, and automobile-related products in Japan and overseas. These products are "eco-products" certified as environment friendly products based on our own standards, and we will contribute to the realization of carbon neutrality through the sale of "eco-products".
